🌐 LinkedIn Profile

AI/ML Engineer and M.Tech Artificial Intelligence graduate with experience in Machine Learning, Deep Learning, Computer Vision, NLP, and Software Engineering. Skilled in Python, PyTorch, TensorFlow, Scikit-learn, SQL, and data pipelines. Built end-to-end AI solutions including source code plagiarism detection, low-light image enhancement, and recommendation systems.

EDUCATION

• University of Hyderabad (UOH)	2024 – 2026
M.Tech in Artificial Intelligence (AI)	CGPA: 8.30
• Gujarat Technological University (GTU)	2020 – 2024
B.Tech in Computer Engineering (CE)	CGPA: 9.08

ACADEMIC PROJECTS

•**AGENTIC AI & RETRIEVAL-AUGMENTED GENERATION (RAG) KNOWLEDGE ASSISTANT**

Designed and implemented an Agentic AI system using CrewAI and Gemini

- Developed an Agentic AI system using CrewAI and Gemini with agents, tasks, tool calling, delegation, and memory.
- Built a reusable RAG pipeline for PDF documents using ingestion, chunking, metadata, embeddings, ChromaDB, and Top-K retrieval.
- Implemented semantic search using Sentence Transformers (all-MiniLM-L6-v2) and cosine similarity.
- Integrated Gemini LLM with retrieved context for grounded question answering.
- **Skills** :Python, CrewAI, Gemini, Agentic AI, RAG, LLMs, Multi-Agent Systems, Embeddings, Sentence Transformers, ChromaDB, Vector Databases, Semantic Search
- **GitHub**: <https://github.com/YashParmar05/agentic-rag-assistant>

•**Adaptive Source Code Plagiarism Detection using Hybrid ML (ADAPT-CLONE)**

Hybrid plagiarism detection framework integrating Token Similarity, AST, PDG, Structural Similarity and Semantic Embeddings

- Designed and implemented a hybrid source code plagiarism detection framework integrating Token Similarity, Abstract Syntax Tree (AST), Program Dependence Graph (PDG), Structural Similarity, and Semantic Embeddings.
- Developed scalable feature extraction and preprocessing pipelines for large-scale datasets containing over 150 million code-pair comparisons.
- Trained and evaluated ML models including Logistic Regression, Multi-Layer Perceptron (MLP), Neural Networks, Random Forest, and SVM for plagiarism classification.
- Improved detection of semantic and structurally modified code clones, outperforming traditional token-based similarity approaches.
- **GitHub**: <https://github.com/YashParmar05/ADAPT-CLONE>

•**Low Light Image Enhancement (LLIE)**

U-Net based deep learning model for illumination and texture enhancement

- Developed a deep learning-based image enhancement model using U-Net architecture to improve illumination, color consistency, and texture details in low-light images.
- Implemented edge-aware preprocessing techniques to preserve fine image structures during enhancement.
- Evaluated model performance using SSIM and PSNR metrics, demonstrating improved visual quality over low-light inputs.
- **Technologies**: Python, OpenCV, TensorFlow, Keras, PyTorch.
- **GitHub**: <https://github.com/YashParmar05/LLIE>

•**Cafeteria Management System (E-Commerce Website)**

Responsive web-based cafeteria management platform

- Designed and developed a responsive web-based cafeteria management platform for online food ordering and menu management.
- Implemented user authentication, shopping cart, order processing, and administrative modules.
- **Technologies**: HTML, CSS, JavaScript, PHP, MySQL.
- **Live Demo**: <https://aksharcafe.42web.io>

EXPERIENCE

•Python Intern – Quantumbot

Jan – Mar 2024

Web Scraping & Data Preprocessing

- Developed Python scripts for web scraping and data extraction using BeautifulSoup.
- Automated the collection and preprocessing of structured web data for analysis.
- Applied fundamental Machine Learning concepts by implementing and evaluating prototype models using Python.

•ICT Development – National Games 2022

Sep – Oct 2022

Indian Olympic Association

- Supported the live scoring and event management system serving 20,000+ users during the National Games.
- Identified, reported, and assisted in resolving 50+ critical bugs affecting application functionality and scoring accuracy.
- Collaborated with backend developers to investigate scoring inconsistencies and ensure accurate real-time match updates.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, JavaScript, HTML, CSS

Machine Learning: Scikit-learn, TensorFlow, PyTorch, Keras, OpenCV, Pandas, NumPy

AI: Machine Learning, Deep Learning, Computer Vision, NLP, Feature Engineering, Model Training, Model Evaluation, Transformers

Databases: MySQL, SQL

Tools: Git, GitHub, Linux, Power BI, Tableau, Excel

Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Software Engineering, Agile

CERTIFICATIONS

•Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Oracle

•GenAI Fluency Accenture

•AWS Cloud Fundamentals Accenture

•Google Analytics for Beginners Google

•Devang Mehta IT Award, 2023 Devang Mehta Foundation Trust

2023

ACHIEVEMENTS

•GATE Qualified

2024

•Solved 250+ LeetCode Problems leetcode.com/u/yash_0512

•Solved 200+ CodeChef Problems codechef.com/users/yash_5212

EXTRACURRICULARS

•Addiction-Free Campaign Organizer Conducted annual awareness programs impacting 1,000+ people across Gujarat

•BAPS Volunteer Script writing, video content creation, and motivational speeches at youth seminars2018 – Present

•Blog Author on Education & Motivation Published 5+ articles on Positive Attitude, Indian Education, and Leadership
